Care and Maintenance Instructions

To obtain the best performance from your new lamp please follow these instructions. It is important not to apply too much twisting force on the lamps telescoping antennas or they may snap. If this happens, you may contact us to repair.

Changing Light Bulbs: To change the light bulbs, please do the following.

1. Unplug the lamp.
2. The bulb is covered by a glass shield. Unscrew the set screw with a phillips head screw driver to access the bulb. Once you have removed the burnt bulb, install a new one. Use only a 35 Watt maximum GY6JCD Bi-pin 12 volt bulb. Otherwise the lamp will not work. (Note with halogen bulbs: do not touch the bulb with your fingertips, use a rag or small piece of plastic when installing.)
3. Once you have replaced the bulb put the glass shield back on with the set screw.

Cleaning: To keep your IO Task Lamp clean, simply wipe with a clean damp cloth.

Troubleshooting

If The Lamp Does Not Work: Please follow these instructions.

1. Light bulb may have loosened during shipping. Make sure light bulb is seated properly. Check to see if lamp works.
2. If lamp continues to not work, change out with a new light bulb. If after that the lamp still does not work, you may have a faulty cord set/transformer. Please notify Pablo for a repair/return instructions.

If there are any additional questions regarding your IO Task Lamp, please contact us directly.
